

**WG ICZM**

**Fourth Meeting**

**Bremen, 26 September 2007**

---

**Agenda Item:** 5

**Subject:** ICZM analysis

**Document Nr.** ICZM-4-5-1

**Date:** 19 September 2007

**Submitted by:** Secretariat

---

**Proposal:** **The meeting is invited to discuss the proposal, contained in the document**

### **Analysis of ICZM cases**

ICZM-3 in principle agreed to analyse several cases for their "ICZM-content", i.e. to what extent project comply with the EU and WSF guidelines for good ICZM. The outcome of the analyses will then be the basis for an ICZM workshop.

Actually, two types of cases can be distinguished, namely examples of policy/management structures and projects.

Below, nine possible cases are proposed, divided over the two types.

#### A. Structural

1. Trilateral Wadden Sea Cooperation
2. Danish National Parks
3. Insel- und Halligkonferenz

#### B. Projects

4. Gas exploitation NL
5. Mussel fishery NL
6. Ems Barrage NdS
7. Jade-Weserport NdS
8. Mussel fisheries SH
9. Varde Aa DK

It is the intention to finalise the analyses before the end of this year.

Some of the Dutch cases will be analysed by a student of the University Groningen, doing a traineeship in the Ministry of Agriculture and Nature Management (LNV).

The German cases can possibly be analysed at the GKSS.

### **Proposal**

The meeting is invited to discuss

- the suitability of the proposed cases (also in terms of availability of documentation);
- the time schedule;
- work load, work division and responsibilities.
