HISTORY

- Wadden Sea on the UNESCO World Heritage List
- Trilateral Coöperation Wadden Sea
- EU attention for biodiversity and alien species
- LIFE+ in 2012 not feasible for various reasons

Objective of the application

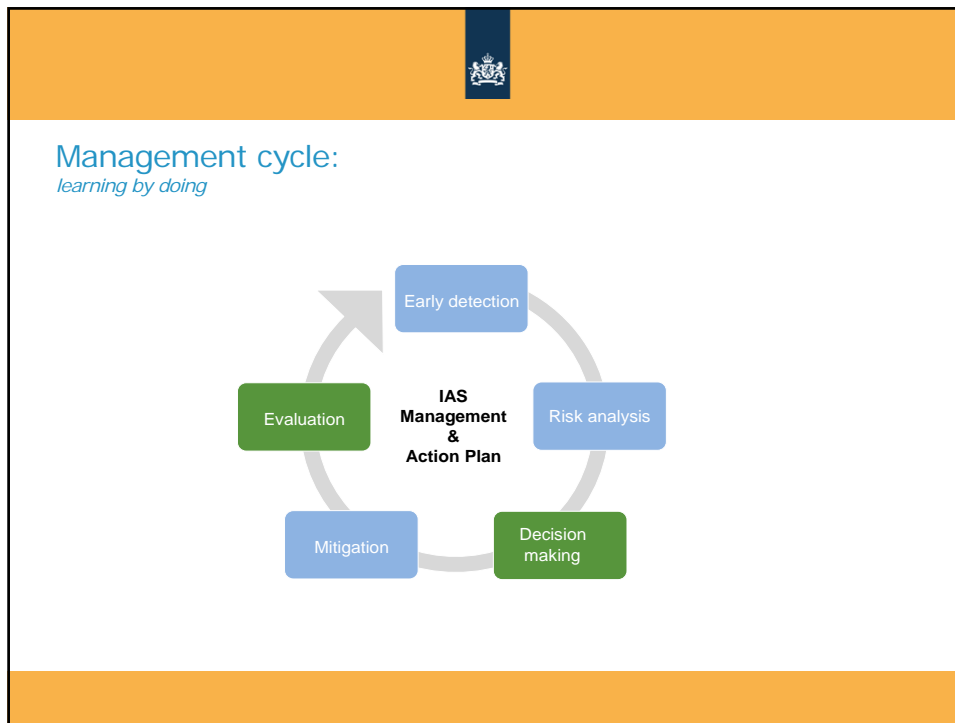

- Framework for trilateral strategy Invasive Alien Species in the Wadden Sea (First outline October 2012)
- Realize a management and action plan: learning by doing
 - Testing the most cost- effective approach
 - Focused on prevention

Management and Action Plan

Five elements:

- 1.Prevention**
- 2.Early Warning/Detection and rapid response
- 3.Eradication and control
- 4.Raising awareness
- 5.Implementation

LIFE+

Offers the chance to assess the best measures
All Wadden Sea and across borders, a lot of stakeholders

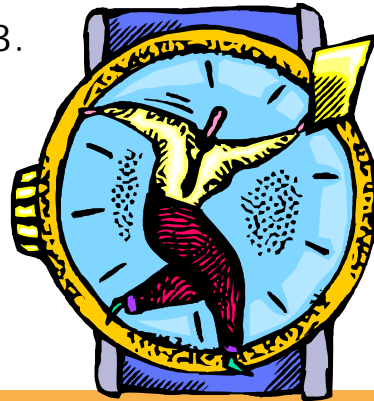

LIFE is the EU's financial instrument supporting environmental and nature conservation projects throughout the EU

LIFE+

Ministry of Economic Affairs stepped up to take care that an application for this LIFE+ tender is submitted

Deadline 25th June 2013.

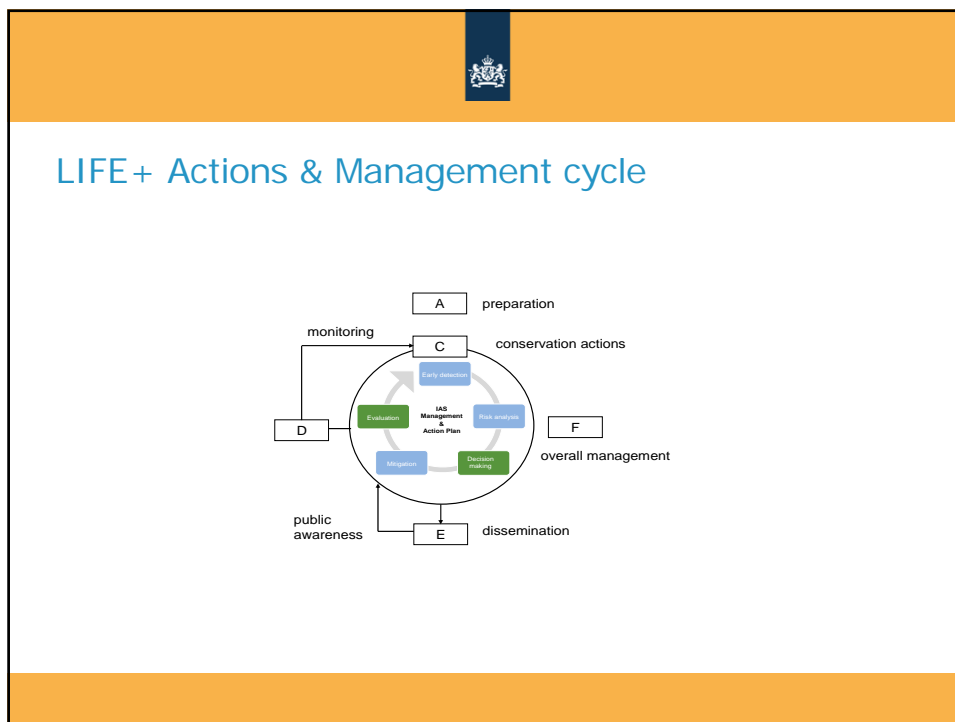

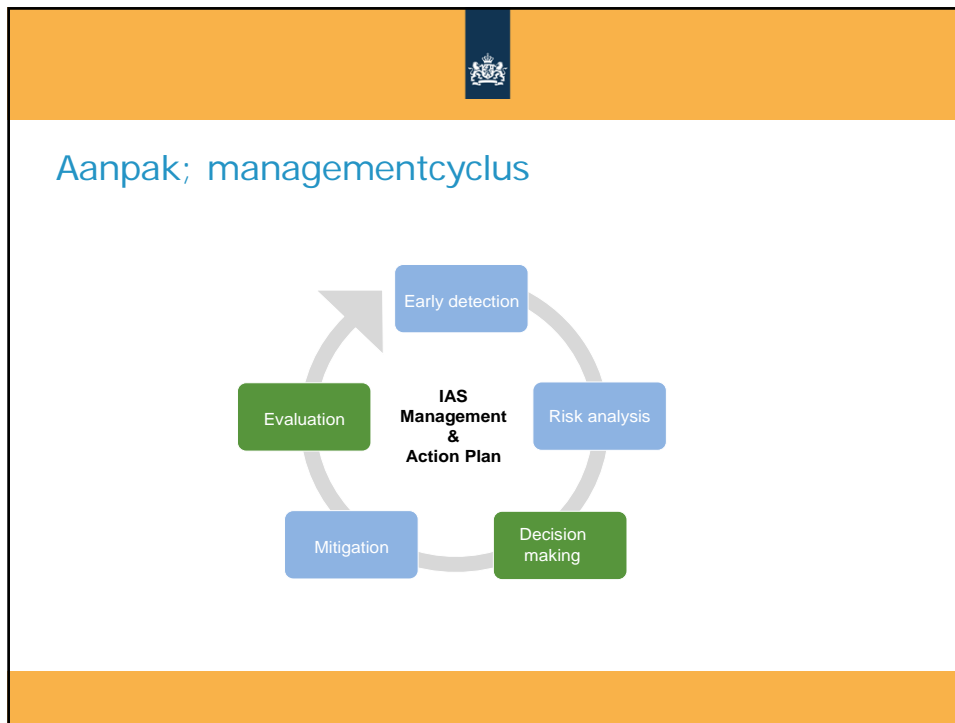

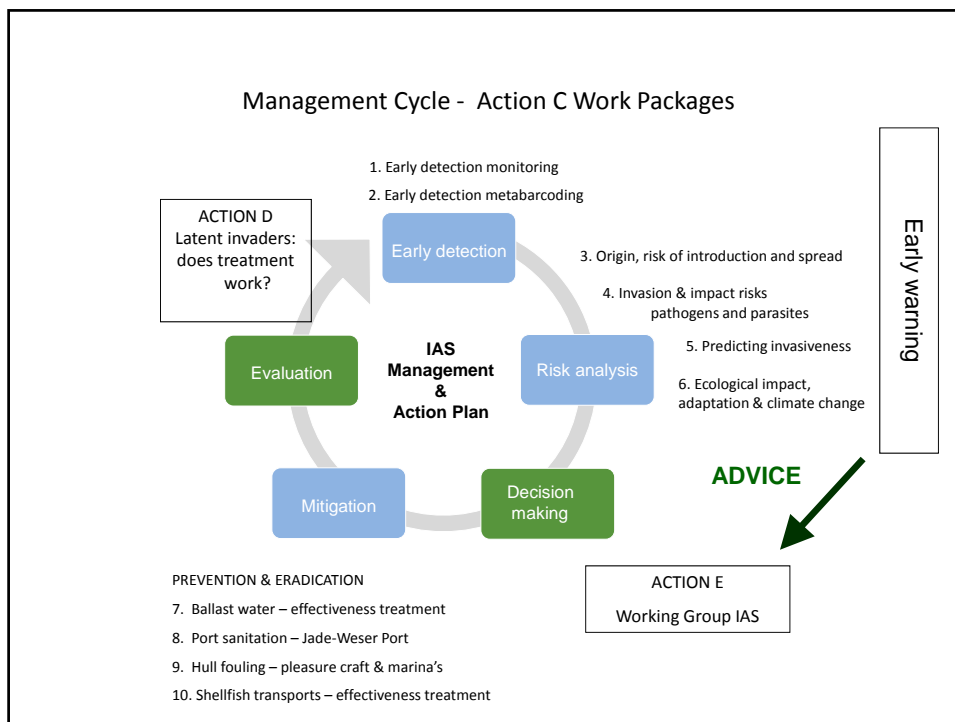

Approach

Meetings and discussions with partners:

- German and Dutch Government
- German and Dutch Research Institutes

Objective: To be sure that we all move in the same direction

Participants (government and researchinstitutes)

Ministerie van Economische Zaken

Ministerie van Infrastructuur en Milieu

GiMaRIS

Private Partners

Groningen Seaport

Jader Weser Port

Damen Shipyards

Next weeks

Workpackages write in LIFE+ language!!

Budget!!! (DL en NL governments € 170.000 cash /year)

Organisation

Letters of support

Support

Signing support letter will help the final approval by the EU

The image shows a close-up of a hand holding a pen, signing a document. The document has some text and a circular stamp. The watermark 'dreamstime.com' is visible at the bottom of the image.

Thank you for your attention

De Waddenzee kent veel verschillende soorten leefomgevingen en biedt daarmee een thuis aan ruim 10.000 soorten planten, land- en waterdieren, van eencellige organismen tot vissen, vogels en zoogdieren. . De Waddenzee is dus van cruciaal belang voor het behoud van de mondiale biodiversiteit.
